

## Our delivery program:

### Cup filling and bottle filling machines

#### Dosing systems for Ampack filling machines

- Inductive flow meters
- Volumetric dosing station (piston valve)
- Rotary valve dosing station without seals
- Cereal dosing station
- Powder dosing station for dessert products
- Micro dosing station for small filling volumes from 1-40 ml
- Dosing station for biscuit crumbs
- Biscuit placing station
- Multilayer dosing station for swirl and side-by-side filling
- Fruit mixing station

#### Engineering-Partner

- Planning of complete filling lines from the filling machine to palletiser
- Ampack as general contractor for the complete filling line

#### Periphery – Final packing line

- Cup packer
- Tray glueing machine
- Tray stacker
- Fruit mixing station
- Special equipment like e.g. toy placing station
- Line synchronisation

#### Convenience closures

- Sensocap®
- Sportscap

#### Customer and spare parts service

- Big stock of spare parts of more than 4,5 mio. Euro
- State of the art inhouse manufacturing
- Consulting and training for maintenance, production and quality assurance

Design: www.creationell.de

# Sensocap®

Sensocap® is the Ampack Ammann solution for the annoying lid peeling off procedure.

Design: www.creationell.de

# Sensocap®

Open the revolution!

Sensocap® is the Ampack Ammann solution for the annoying aluminium lid peeling off procedure. It fulfills the highest requirements for aseptic filling by granting at the same time maximum convenience to the consumer. With its special blades the Sensocap® automatically peels the lid completely of the bottle during the first opening. The lid remains safely inside the cap, and serves as a sealing gasket after re-closing. The Sensocap® feature can be easily integrated and retrofitted in any existing Ampack bottle filling line and it is available for HDPE, PP or PET bottles.

This concept combines the highest aseptic and sensorical safety of the sealing with aluminium lid with the convenience of easy-opening for the consumer.
